## The Two Big Lies Of Type 2 Diabetes

0 0 0 0

[July 16, 2015](#)

For those who suffer from diabetes, or have a relative who has it, this video is a must see. Most people think diabetes is a progressive, irreversible disease. It is not, as you will see in the video.

Someone asked about herbal remedies for diabetes in a posting I put up on herbal remedies. This video will answer many questions for that poster.

As a side note, though the video is primarily about Type-2 Diabetes, it can also be said that Type-1 diabetes can be cured. I know of a man in his late 40's or early 50's, who has had Type-1 diabetes his entire adult life. He was told he would probably die from it in a year or two, as it was progressing rapidly. He did some research on his own, and is now totally off insulin, and has been since December of last year. His diet is strange, but it is healing him.
