probably gonna go a little nuts on planting those next year now, along with more mint.

with enough of these sucking up juglone, I might be able to plant some nitrogen fixers in with them like false indigo. and more herbs like mint and rosemary.

thanks for the tip on the black elderberries! will definitely plant them around some spots, need to free up the back area for more fruit stuff, front is going to flowers for decoration, and a grape vine... only have a sweet gum tree in the front.

The eco-terrorists have been hard at work.]> <https://www.oathkeepers.org/did-you-know-that-the-u-s-no-longer-has-any-strategic-grain-reserves-at-all/#comment-39435> Thu, 20 Aug 2015 17:32:19 +0000 <https://www.oathkeepers.org/?p=7681#comment-39435> Plant elder berry 'trees', they usually only make shrubs in the states, around your black walnuts. There are other plants that will do this, but if you get ahold of black elderberry then you can make a real good flu busting medicine out of it. Anyway, the elder isn't harmed by Juglone and will actually prevent said poison from spreading past it. If I remember right Serviceberry has a similar effect. That way you can keep your prime edible walnuts, grow more food/medicine, and with judicious pruning plant some sun lovers back there too. Keep in mind for any of those black walnuts you do fell, that is quite valuable wood you'll have on your hands.]> <https://www.oathkeepers.org/did-you-know-that-the-u-s-no-longer-has-any-strategic-grain-reserves-at-all/#comment-39328> Thu, 20 Aug 2015 08:10:24 +0000 <https://www.oathkeepers.org/?p=7681#comment-39328> Are they destroying Our Land, burning down the Forest, spilling oils in the Water, polluting the Air, to justified the global warming rules?

To create mass famine, so we will comply?
