

T U E S D A Y , M A

I strive daily to speak to people in the Armed Forces about their oath and what it means

I am a USAF Civil Engineer Staff Sergeant, I am proud to stand up and re-affirm my oath to the United States of America and to it's Constitution.

I have protected our great country and it's Constitution from foreign enemies and am prepared to do the same against domestic threats. I strive daily to speak to people in the Armed Forces about their oath and what it means, I work to educate people on the current travesties being wrought upon our Constitution.

I would like to sincerely thank Oath-Keepers for bringing this message to the public.

It is important for the public to be reassured that the Military both present and past as well as law enforcement officers will stand by their oath and protect them.

Engineers, Kicks A**
