Testimonial: I joined the oath keepers because of the oath I have taken. I may not have finished my military training. However, that does not change the fact that I raised my right hand and took an oath of enlistment. I am frustrated with having a governmental system that is indeed broken. I make it my personal mission to petition any possible unconstitutional bill that I see. I strongly believe we are on the wrong track. We need to get back to the basics and stop complicating the lives of the people of the United States. I believe we can all do something swift and take legal actions via petitions or contacting the politicians we, the American people voted in and remind them they have an oath to uphold.
