Is This Job For You

From Shorty Dawkins, Associate Editor

The following appears on the California Highway Patrol website, re: careers with CHP. It is from the PDF, and is very revealing as to the attitudes of the police in recent times. We, at Oath Keepers, have been warning of the militarization of police departments across the country.

Is This Job for You?

Here are a few questions all applicants should ask themselves before applying to become a CHP Cadet. If any of the questions make you feel uncomfortable, or you answer in the negative, you may not be ready to go through our testing, evaluation and training process. Our goal is for those who are suited to the profession of CHP Officer to succeed, and to not set up for failure those who are not suited to the profession.

1. Are you willing to work in a para-military organization, operating under a structured chain-of-command?
