Army Veteran Understands Resolve

Hey guys,

In 1967 I raised my hand and took the oath to protect and defend as I joined the US Army. I took that oath three more times.

From what I see, many of those to day just mumble those words without regards to their meaning or have no idea as to how our country was formed and what the Founding Fathers and all the men and women of their time gave up and were risking.

Please do not take this the wrong way because I have to know just how serious you are. Do you know what that oath means? As I said, no insult intended with the question.

At night I sit here and at time feel tears of frustration fall on my cheeks as I see what is happening to my country. It is not the country that my father taught me to love, politically. It is only

**what my father taught me and my own belief
system that keeps me from pulling a weapon and
going John Wayne, Audy Murphy or Davy Crockett.**

**A friend sent the youtube video this morning and I
find I cannot get it out of my head several hours
later. I like to think that Glenn Beck and others like
him are looking out for those of us who still think
the United States of America is a divine inspiration
of our Founding Fathers and worth putting their
lives on the line for those principles it was founded
on.**

Respectfully
